## **Update on Batavia Chiropractor David Hanson Case**

**ST. CHARLES, IL** – The Kane County State's Attorney's Office provides the following update regarding the ongoing investigation involving Batavia chiropractor David Hanson.

Hanson was arrested earlier this month and charged with five counts of Producing Child Pornography, three counts of Disseminating Child Pornography, six counts of Possessing Child Pornography and three counts of Unauthorized Video Recording of a Minor Through/Under the Clothes.

Based on the information gathered to date, investigators believe that David Hanson acted alone. At this time, there is no evidence indicating that Hanson's family members or the employees of Hanson Family Chiropractic were aware of or involved with the alleged criminal activity.

The State's Attorney's Office has received more than 1,500 calls and emails to the dedicated tip line from potential victims. Investigators in our Child Exploitation Unit have begun identifying possible victims and will be actively reaching out over the coming weeks to those individuals.

**A dedicated webpage has been created to provide the public with updates on the case. It can be accessed at <https://sao.kanecountyil.gov/Pages/Hanson.aspx>. This webpage will display the most up-to-date information on the case as well as frequently asked questions.**

Individuals who have already reached out to our office via the tip line do not need to reach out again. The Kane County State's Attorney's Office remains fully committed to transparency and accountability throughout the course of this case, and we intend to share developments whenever doing so will not compromise the integrity of the investigation. We thank the public for their continued patience, cooperation, and willingness to come forward.

Hanson is currently detained in the Kendall County jail while his case is pending. His next court date is set for January 8, 2026 at 9 am in courtroom 305 of the Kane County Judicial Center, Case No. 2025-CF-2638. [Read our previous press release here.](#)
